Question taken from

linear_form, exercises 2.3,b,e

## 1 Question No 1

Draw the graphs of the following equations

$$1)\begin{pmatrix}1 & -1\end{pmatrix}\mathbf{x} = 2 \tag{1.0.1}$$

$$2)\begin{pmatrix}1 & -1\end{pmatrix}\mathbf{x} = 0 \tag{1.0.2}$$

## 2 Solution

1) put $\mathbf{x} = \begin{pmatrix}x\\0\end{pmatrix}$

$$\begin{pmatrix}1 & -1\end{pmatrix}\begin{pmatrix}x\\0\end{pmatrix} = 2 \tag{2.0.1}$$

$$\implies x = 2 \tag{2.0.2}$$

put $\mathbf{x} = \begin{pmatrix}0\\y\end{pmatrix}$

$$\begin{pmatrix}1 & -1\end{pmatrix}\begin{pmatrix}0\\y\end{pmatrix} = 2 \tag{2.0.3}$$

$$\implies y = -2 \tag{2.0.4}$$

$$\mathbf{P} = \begin{pmatrix}2\\0\end{pmatrix}, \mathbf{Q} = \begin{pmatrix}0\\-2\end{pmatrix} \tag{2.0.5}$$

2) there is no constant in the line equation thus it passes through the origin

put $\mathbf{x} = \begin{pmatrix}1\\y\end{pmatrix}$ in equation

$$\mathbf{A} = \begin{pmatrix}0\\0\end{pmatrix}, \mathbf{B} = \begin{pmatrix}1\\1\end{pmatrix} \tag{2.0.6}$$

Graphs using python are constructed for equations (1) and (2) The obtained lines have equal slope and their y-intercepts are different, Thus obtained lines can be said to be parallel
